SUBJECT: Resubmittal of Sampling Plan for the Denver and Rio Grande  
Western site, Alamosa, Colorado. TDD F08-8905-12

cc: Pat Smith, Colorado Site Assessment Manager

Please find the attached Sampling Plan for the Denver and Rio Grande Western site in Alamosa, Colorado. The plan was originally submitted on July 19, 1989, however access problems and EPA site prioritization have resulted in delays in implementing the sampling. Janet Liner, EPA Field Quality Assurance Officer, has requested the plan be resubmitted for re-review. The FIT is currently coordinating with ESD for a CLP laboratory and the EPA Legal Counsel is engaged in site access for the sampling event. The FIT anticipates conducting sampling in early June, therefore expeditious re-approval of the Sampling Plan would be appreciated.

Please call if you should have any questions regarding this memo or the sampling plan.
